

Spanish Phenomenology – from the 8th Century of Vigil, to the contemporary world – Ortega y Gasset typologies of what is called conceptual, non-conceptual and existential but phenomenological actually types of structures of thought – why it is Spanish philosophy is because the unique meaning of Vigil's Aeneid is in fact the Individual Aeneid which then also means the promise of Christian liberalism against conservatisms of all kind –

By Shomit Sirohi

Introduction

The following system is Spanish from Vigil's Aeneid – not the subject and politics – but the body, thought and sex of it.

I. Spanish – the language and its mind and philosophy – A Biblical Account

When in fact Spanish antiquity was artisanal crafts, without slavery, and Moorish eventually by feudalism and monarchism, which was Christian in fact and arcs back to Vigil in the poetic traditions of Argentina today like Borges perhaps.

Spanish as a language and philosophical culture is Christian,

Quranic and even Jewish
mercantile – anti-slavery – and
therefore against the currents of
Hegel, Spinoza and systematic
philosophy because those are
conservative forms against
experimental forms – in a sense
dominant tradition, not an
aleatory current of subterranean
minor logics which have to be
poetic.

II. Major and Minor in Heidegger

In fact there are two traditions
one belongs to the major logic of
philosophy, another to the minor
tradition of St. Paul in fact, and
Epicurus, even. Paulinianism is
strong in fact in Spain, unlike
other countries in history. France

was bound by Ionian merchant capitalism and was trader merchant and migrant but with a support from the Greeks but also negotiating anti-slavery.

III. Spanish Philosophy as Phenomenology by the 20th century in fact, with long traditions of poetic philosophy

In fact then just the poetic intuition matters, I called this postmodern in A Draft that it is a certain Messianic tradition to read parables, even postmodern whatever, and as such as revelation of intuition only, imagine that a whole philosophy of intuition.

What I meant there was of course singularity, that singularity is something profound, dense, and full of phenomenology and letters and cartas, and even games and poems – and that is intuition as method.

IV. Philology - now let us intuit

I meant philology in Spain is strong in Valencia or even its old architecture to be protected by Moorish women in their safety from modern violence of conservative and patriarchal men – this is another point – sex, love and the fall.

Parte II

En Espanol hablamos sobre, la profecience de la proceso de corantes como cropas, y gropas y processos de sexualidad y amor, para la persona que tiena la intuición de amor para mi.

Esto también es philosophical como la poesía de amor que tiene philosophia.

Ahora la leo la juego.

Hacemos la contradicción – ante-conceptualismo – también con la concepto y existencia, profundamente, y la intuición – hablamos en Arabic sobre la intuición – que la veo, que la digo en phenomenologia solo.

Tambien entramos en Derrida y Althusser – it is posible then to articulate this to language and philosophy as reflections.
